About me

A highly motivated undergraduate Computer Science student at Binus Online Learning with a strong interest in IT, particularly as a Software Engineer or Full-Stack Developer. Passionate about learning new things and embracing challenges, with a competitive yet positive mindset aimed at continuous growth. Skilled at adapting to new environments and connecting with people easily. Enjoys problem-solving through platforms like LeetCode and building new projects to explore innovative solutions.

Education

Binus Online Learning - Binus Bekasi

Sep 2022 – Oct 2026 (Expected)

Undergraduate in Computer Science, GPA: 3.92/4.00

Work Experience

PT. Inti Utama Solusindo (Pharos Group) - South Jakarta

Aug 2025 – Feb 2026

Backend Engineer

- Developed and maintained scalable backend systems using Python (Django) and PostgreSQL.
- Refactored 10,000+ lines of legacy code, improving maintainability and long-term scalability.
- Optimized backend logic and database queries, achieving up to 10x performance improvement.
- Redesigned and normalized the ERD to eliminate relational ambiguities and improve data integrity.
- Developed automated form-to-document generation tools, enhancing workflow efficiency.
- Improved database structure by introducing structured categorization, replacing inefficient text-based filtering with indexed queries for better performance.

Achievements

Achieving the highest Grade Point Average (GPA) in the Computer Science Study Program During The Period 2221 in 2023

Menunjukkan prestasi akademik yang luar biasa dengan komitmen kuat terhadap keunggulan, ditandai dengan hasil yang konsisten tinggi melalui ketekunan dan usaha maksimal. Certificate:

License and Certifications

Dicoding

Sep 2024 – Sep 2027

Javascript for Beginner

Link Certificated: <https://bit.ly/4bLhSbl>

Learning Javascript for basic like OOP, Function, and asynchronous process.

Dibimbing

Nov 2024 – Nov 2027

Front-end Developer

Link Certificated: <https://bit.ly/4htCLcm>

Learning basic Front-end Developer, like HTML, CSS, basic Javascript, and create basic website.

Dicoding

Jul 2025 – Jul 2027

Memulai Pemrograman Dengan Java

Link Certificated: <https://bit.ly/4IEABto>

Learning Basic Java OOP like Class, Object, Function, Inheritance.

Organisational Experience

SCIO

Feb 2019 – Sep 2020

Vice Chairman

a place for youth scientific work that discusses scientific knowledge

- Monitor class activities in certain divisions.
- Provide a brief explanation of scientific papers.
- Organize activities in a division

Skills

- **Soft Skills:** Problem-Solving, leadership, adaptability, teamwork, easy going, empathy, Debugging.
- **Programming Languages:** HTML, CSS, Python, Nextjs, Javascript, Typescript, Golang, Java, Django, C, NestJs, C++, Lua.
- **Database:** PostgreSQL, Prisma, SQL.
- **Tools:** Git, Postman API, Figma.

Projects

Bot Discord Reminder (Python):

May 2024

Created a Discord bot to automate schedule reminders, with the following features:

- **Tech Stack:** Next.js, PostgreSQL, Prisma.
- **Key - Achievement:**
 - Customizable reminder creation for users.
 - User tagging functionality to ensure timely notifications.
 - User-friendly interface for viewing and managing reminders.

Fullstack Developer | E - Commerce:

Jul 2024

Developed a Codashop inspired e-commerce platform using Next.js and PostgreSQL, featuring:

- **Tech Stack:** Next.js, PostgreSQL, Prisma.
- **Key - Achievement:**
 - Secure item purchase functionality for users.
 - Search capabilities for game discovery.
 - Dedicated admin portal for game and item management, including transaction monitoring.

Fullstack Developer | Admin Dashboard:

Aug 2024

Designed an intuitive admin dashboard as part of a Next.js learning initiative, focusing on:

- **Tech Stack:** Next.js, PostgreSQL, Prisma, Tailwind.
- **Key - Achievement:**
 - Monitor user transactions.
 - Data visualization to track and analyze company growth metrics.
 - Place orders directly.

Fullstack Developer | Todo List:

Sep 2024

Built a task management tool using Next.js and PostgreSQL, enabling users to:

- **Tech Stack:** Next.js, PostgreSQL, Prisma.
- **Key - Achievement:**
 - Create and manage todos effortlessly.
 - Edit todo titles and descriptions dynamically.
 - Update task statuses to reflect completion progress.

Fullstack Developer | Website Freelance Designer:

Jan 2026

Website for Freelance Designer to selling their service using Crypto currency (ETH)

- **Tech Stack:** Next.js, PostgreSQL, Prisma, Solidity, MetaMask.
- **Key - Achievement:**
 - Built a fullstack freelance marketplace for digital art services with a scalable architecture using Next.js, Prisma, and PostgreSQL.
 - Implemented crypto payment integration (ETH) via MetaMask, enabling secure and seamless decentralized transactions.
 - Developed a smart contract-based escrow system (Solidity) to ensure safe transactions between clients and creators.

Fullstack Developer | Website Management Shopping list:

Jun 2026

Full-stack web app for personal expense tracking and shopping list management.

- **Tech Stack:** Next.js, TypeScript, Java, Spring Boot, Hibernate, PostgreSQL, Lombok
- **Key - Achievement:**
 - Built RESTful API in Spring Boot with layered architecture (Controller → Service → Repository) and DTO mapping to decouple entities from API contracts.
 - Designed expense-tracking module with date-range aggregation (daily/weekly/monthly summaries) using JPA derived queries and Java TemporalAdjusters.
 - Implemented global exception handling (@ControllerAdvice) for consistent error responses and custom ResourceNotFoundException handling across endpoints.
